PLAY IS BEAUTIFUL

Commercial Play | 2020

CEDARWORKS Values

Play is Beautiful

Children playing—laughing, running, climbing, doing what children are meant to do—that’s beautiful. The developmental benefits that come from active play are beautiful, too. At CedarWorks, we design beautiful products that encourage active play because we believe Play is Beautiful any way you look at it.

CEDARWORKS Products

The Highest Quality Construction and Materials

At CedarWorks, we only select materials that are environmentally-friendly, kid-friendly, and the best for the purpose. We use splinter-free, chemical-free, naturally long-lasting Northern White Cedar for our outdoor products and furniture quality hardwoods, cabinet grade panels, and water-based stains for indoor.

By only employing time-tested construction methods and unwavering attention to detail, we make sure that every CedarWorks product, indoor or outdoor, is built to last.

Where It Comes From

CedarWorks products are crafted at our plant here in Maine and at select family businesses in our area. That means our products are made right and on time and customization is no different than standard production.

It also means the environment is protected, and we provide our employees with a safe workplace and good wages and benefits. CedarWorks was recently honored to be included on a list of "Best Places to Work in Maine."

We hope you feel as good about this as we do.

Indoor play is good for kids. Active play is critical to a child's social, cognitive, and motor development. When children are engaged in active play they use their imaginations, move their bodies, and practice their social skills, all of which promote healthy growth and development. And did we mention it's fun?

Indoor Play

Designed to Meet Your Needs

At CedarWorks, we produce the highest quality play systems, furniture, and playroom accessories. From a small playset to fit in a corner to a giant play system at the center of your playspace, CedarWorks meets your indoor play needs with beautiful, durable products.

Earth-Friendly Materials

The posts, braces, and panels of all of our indoor products are finished with ultra-low VOC water-based stains, so they are safe for kids and better for the environment.

Safety Standards

When it comes to children's play areas, safety is paramount. You want the kids in your facility to be safe and have fun, and so does CedarWorks. All of our new product designs start with safety at the forefront of the design process. Because we are committed to providing a safe environment for children, we designed all of our commercial play systems to meet or exceed ADA, ASTM, and CPSC safety standard specifications for their age groups.

2&Over

Play is Beautiful. Shouldn't a playset be beautiful, too?

Our indoor play systems designed for children ages 2 and up are endlessly customizable due to their modular design and a wide variety of accessories to encourage active play.

Custom Fit

Every play space is different, and so is every CedarWorks indoor play system. Tucked in a corner, spread along the length of a wall, or centered in the middle of the room, our modular playsets can be customized to fit any space, large or small.

Choices, Choices

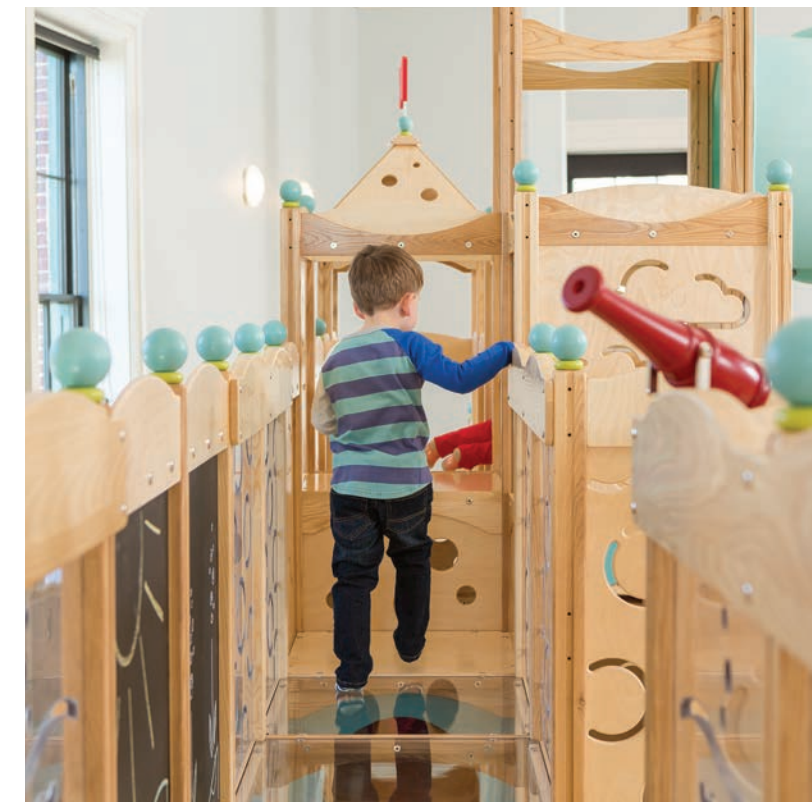

Choose from 2 play deck sizes, 4 play deck heights, more than 20 accessories, and a huge selection of fun and functional play panels. With so many options, CedarWorks can provide the perfect play system to fit your needs.

Hardwood Frames

The locally sourced White Ash used in the posts and braces of our indoor play systems is the same wood traditionally used for Major League baseball bats, so it's strong enough to handle anything thrown its way. Combined with our cabinet grade Baltic Birch panels, CedarWorks indoor products are always beautiful, safe, and strong.

Under2

Just because you're small
doesn't mean you can't play big

Our newest playset line features modular design, environmentally-friendly materials, and a variety of play accessories specific to the developmental needs of infants and toddlers ages 6-23 months, like a small slide, mirrored panels, and easy-to-climb ramps and stairs.

UNDER2 204

Fits Your Space

Our indoor playsets are modular and feature panels and play accessory configurations to allow you to choose or design a playset that fits a small or large play area, in a corner or smack in the middle of the room. Whatever your play space allows, we can fit.

Kid-Friendly Materials

CedarWorks takes pride in only using the best materials for play. All of our indoor playsets for ages 6-23 months use cabinet grade Baltic Birch panels, so they are beautiful, safe, and durable. They are then finished with ultra-low VOC water-based stains, ensuring that they are both safe for kids and better for the environment.

Just What You Need

With cubbies to store bags or shoes and modular benches to sit on or store stuff beneath, CedarWorks has everything you need to complete your play space.

Our modular bench design means you can size your bench to fit your needs. Start with a single unit bench that fits in a corner or expand infinitely to fit even the biggest space. You can also choose a simple bench style or add cubbies underneath or fences above.

Inspiring Fun

For even more fun, add toys and playhouses that are as beautiful and playful as the rest of our commercial indoor playset collection.

Beautiful playhouses to inspire kids' imaginations, a seesaw and rocker for active play, or a table and chairs for crafts and coloring projects, our playroom collection adds the finishing touches to your play area.

Importance of Outdoor Play

Outdoor, unstructured play is good for children. It boosts social development and improves gross and fine motor skills. It also improves attention and listening skills. Children who play outside on a regular basis do better in school.

CedarWorks commercial outdoor playsets promote active outdoor play both for children's health and for their happiness.

Outdoor Play

Outdoor Play Designed to Meet Your Needs

CedarWorks produces the highest quality, most beautifully designed outdoor playsets in the world. From a simple playset that encourages active play in a small area to a sprawling set designed to entertain dozens of children at once, CedarWorks' customizable playsets meet all your outdoor play needs.

The Best Material for Outdoor Play

CedarWorks outdoor playsets are constructed from Northern White Cedar, a wood that is native to North America. Northern White Cedar is uniquely suited to outdoor uses like playsets, fences, and patio furniture not just because it is good-looking but also because it is long-lasting and does not require paints or stains to maintain.

Custom Fit

Do you need a playset to fit a large playground and accommodate dozens of children at a time? Or are you looking for something small that can tuck into a corner of your play area? CedarWorks playsets are modular, so they can be designed to fit any space whatever the size or shape.

Playsets

Our Outdoor playsets give you more of what you want

CedarWorks Commercial Outdoor playsets have custom cut Northern White Cedar 2x4's and 4x4's, weight-bearing braces, mortise and tenon ladder steps, and heavy duty hardware. They don't have chemicals, splinters, or extra plastics. So your playground gets more of what you want and less of what you don't.

PLAYSET 595

Playsets

Naturally Beautiful

The beauty of a Northern White Cedar playset is that it is naturally beautiful, naturally long-lasting, and naturally splinter-free without paints, stains, or other chemical treatments, so it's safer for kids and better for the environment.

Fun for Kids of All Ages

A playset for toddlers should be sized to provide fun and be accessible for toddlers, while a playset for school-age children should challenge their growing bodies and improving motor skills. Depending on the ages of the children using your play area, you can choose or design a CedarWorks commercial outdoor playset to meet safety standards for 2-5 year-olds, 5-12 year-olds, or 2-12 year-olds.

Playsets

Safety Standards

Playgrounds are all about fun, but safety and inclusiveness are of primary importance, too. All of our product designs start with safety at the forefront of the design process.

We use the highest-quality materials as well as construction methods and design rules that ensure that our playsets, like all of our products, are as safe as they are beautiful and fun. All of our commercial play systems meet or exceed ADA, ASTM, and CPSC safety standard specifications.

What do I do now?

The next step is easy.

Do you see the perfect Playset?

Give us a call to order now.

Do you see almost the perfect Playset? Give us a call or go to CedarWorks.com to modify your favorite design.

Do you want to design the perfect Playset? Give us a call or go online and start designing now.

Outdoor Playhouses

Should a playhouse be mostly about play or about house?

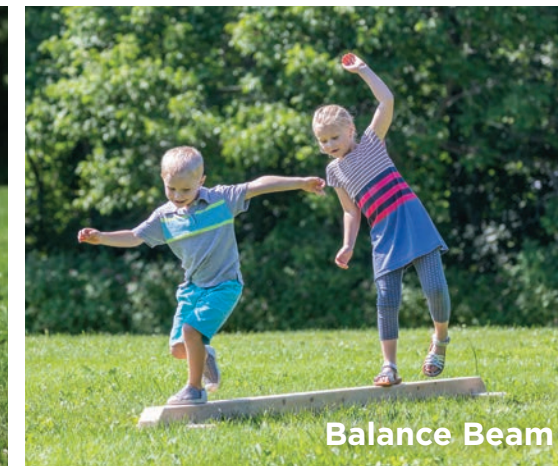

We couldn't decide, so our Commercial Outdoor Playhouses are both. Our playhouses, featuring post & beam framing and tongue-in-groove siding, are made for active play, social play, or playing house. Choose your style, Modern or Classic, then choose your panels, and get the perfect playhouse for your playground.

Playground Furniture and Toys

Complete Your Playground

CedarWorks outdoor furniture and toys add function and fun to any playground. Picnic tables, chairs, and benches for when it's time to take a break, and sturdy toys like a balance beam or our Rockapotamus for more active play will keep children—and grown ups—happy during outdoor play.
